AB	The coagulants consist of highly water-absorbing polymers added with disinfection and ***deodorization*** components. The coagulants are convenient for disposal of infectious wastes, wastewater, blood, etc., from medical facilities.				
ST	wastewater coagulant polymer disinfection ***deodorization***				
IT	Perfumes (water-absorbing polymer coagulants contg., for wastewater treatment)				
IT	Polymers, uses RL: USES (Uses) (water-absorbing, coagulants, for wastewater treatment, with disinfection and ***deodorization*** components)				
IT	Wastewater treatment (coagulation, water-absorbing polymers for, with disinfection and ***deodorization*** components)				
IT	Wastewater treatment (***deodorization*** , water-absorbing polymer coagulants for, disinfection and)				
IT	Wastewater treatment (disinfection, water-absorbing polymer coagulants for, ***deodorization*** and)				
IT	***2893-78-9*** RL: PROC (Process) (disinfectants, water-absorbing coagulants contg., for wastewater treatment)
